Summary

The Fourth Industrial Revolution represents a fundamental change in the way we live, work and relate to one another. It is a new chapter in human development, enabled by extraordinary technology advances commensurate with those of the first, second and third industrial revolutions.

After losing my job as a travel consultant as a result of COVID-19, I knew I wanted to be a contributor to this AMAZING revolution. I started researching and came across Wethinkcode_. Wethinkcode_ offers a two year, tuition free, NQF level 5 qualification in systems development. I was fortunate enough to have been accepted to the program. In my time at here, I was exposed and learned various programming languages. These include:

*Python
*Java
*Dart
*JavaScript
*HTML & CSS

*SQLite (DBMS)
*Flutter (Framework).

As a newbie to the field, I struggled in the beginning, I have since grown and came to understand programming concepts well. I am a hardworking, easy to work with individual, and always open to challenges.

Experience

Safari Travel Consultant

Jan 2018 - Aug 2020 (2 years 8 months)
